

## Data Lake

A massive, digital swimming pool.

- Storage system that holds **large amounts of raw data in many forms**
- It can hold things that would never fit into a regular spreadsheet box
- **Voice recordings & music files**
- **Video clips & movies**
- **Photos & drawings**
- **Regular numbers & spreadsheets**
- **Whole books of messy content**

Data lake is:

- Cheap & fast
- Flexible
- Ideal for big data & machine learning

## Data Stories & Story telling

- Data storytelling is taking facts & turning them into a movie that everyone wants to watch
  - You need to be able to tell a story from your data
  - You need to extract **questionable insights** from your data.
- To drive business decisions
