

After coding: You will have a summarized table

Can build a report from the unified table

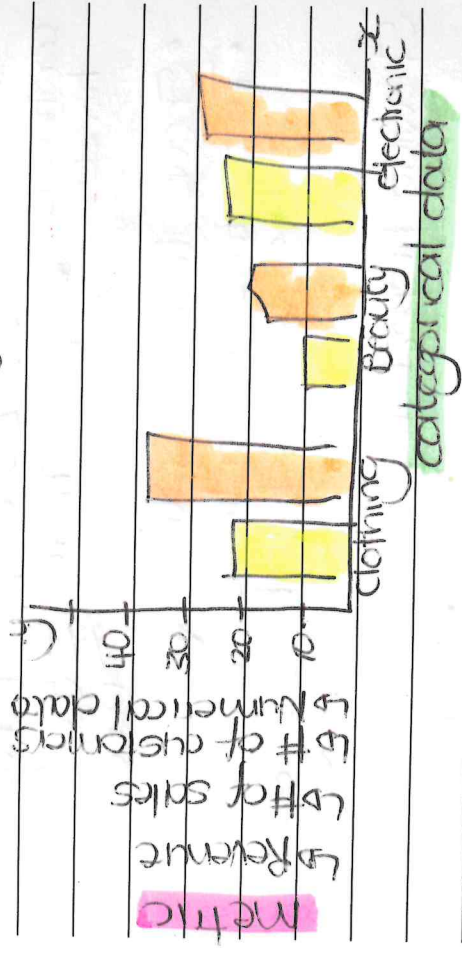

Analyst: Before you answer, Ask data driven questions, Understand what is needed by asking the right questions

6 June 2026 - The Data Design Blueprint.

Choosing the right chart for effective story telling.

a) Bar graph. (or bar chart)

Used when comparing categories

Metric: Something we are measuring

- Has a form of scale.
- Is numerical data / Quantitative

Categorical data: Grouping data

- Data that groups info into groups.
- Is mainly word. Example: Male, Female
- Granular
- Gender - Split
- Female
- Male
