

→ SELECT statement allows you to specify the columns you want in your final output.

SELECT * (The big dump!)

* that star means **EVERYTHING!**

→ SELECT * is a way to select all the columns from your table without specifying column names one-by-one.

→ Gets you all the column names from the table.

When you are selecting specific column names, you separate each column name by using a comma (,)

SELECT Date,

Gender,

Age,

• Quantity

FROM retail_sales_dataset

⇒ You want specific columns from your table.

• On the last column specified, you DO NOT put the comma.

SELECT DISTINCT No copies allowed

→ We want to get different values from a specific column.

→ We remove duplicates

→ We don't want to repeat the same value

Syntax: SELECT DISTINCT column_name
FROM table_name

Fruits_orders

Order_ID	Prod_name	Revenue
101	Apple	100
102	Orange	50
103	Apple	60
104	Banana	150

Specify the column name you want
/ diff values

SELECT DISTINCT prod_name

FROM fruits_orders

Prod_name

Apple

Orange

Banana
