The 'SORTING' statement

⇒ A way to sort out data.

"ORDER BY"

↳ In SQL this is a sorting statement.

2 Ways to sort out data:

(a) ASCENDING ORDER (ASC) or

(b) DESCENDING ORDER (DESC)

⇒ It is a way to rearrange our data.

⇒ Sorting does not remove or add anything new to our data

ASCENDING ORDER = Something is
(ASC) going up ↑

= From smallest to biggest

= From lowest to highest

1-9 ; a-z

DESCENDING ORDER = Something is
(DESC) going down ↓

= From biggest to smallest

= From highest to lowest

SYNTAX: Select *

From table_name

Where condition

ORDER BY column_name **ASC;**

SYNTAX: Select *

From table_name

Where condition

ORDER BY column_name **DESC;**

Students

Student_ID	name	age	course	city
1	Thabo	22	Data Ana	JHB
2	Sarah	19	Data Sci	PTA
3	John	25	Data Ana	DBN
4	Lerato	20	Data Ana	JHB
5	Musa	23	Data Sci	JHB
