

Red box (6) cars - keep it
 Green box (5 cars) - keep it
 Blue box (1 car) - Put it away.

HAVING, is a special rule used after you group things together, to filter out the groups you don't want!

HAVING statement

- Used to filter data that is aggregated
- Applied to data that is already aggregated

- Used to filter grouped results after using GROUP BY

WHERE VS HAVING

- WHERE filters rows BEFORE grouping

- HAVING filters rows AFTER grouping

Example:

Sales

Cust_ID	Cust_name	Product	Amount
101	Rafhi	Laptop	5000
101	Rafhi	Mouse	300
102	Abel	Keyboard	700
102	Abel	Monitor	2500
103	Ciara	Mouse	300

Write an SQL query to find customers who spent more than 3000

```

1 SELECT cust_name,
   sum(amount) AS total_spent
FROM sales
GROUP BY cust_name

```

↓

Cust_name	total_spent
Rafhi	5300
Abel	3200
Ciara	300

```

2 HAVING sum(amount) > 3000

```

↓

Cust_name	total_spent
Rafhi	5300
