

Coding in the folder we created that's linked to Github

- Go to workspace in databricks
- Click on folder that is connected to Github.

- Create
- Notebook - Rename for better ref.
- Code

Pushing to Github:

- Workspace
- Git
- Put commit message
- Go to Github
- Refresh page.
⇒ Everything that you did on databricks is cloned onto Github.

Bright TV Big Code

With CTE	WITH SUBQUERIES
With user-profile	SELECT --
AS (codes to clean table)	SELECT --
With viewership	SELECT --
AS (codes to clean table)	FROM (codes to clean table)
SELECT --	LEFT JOIN AS A
--	(codes to clean viewership) AS B
--	ON A.userid = B.userid

From viewership.cte AS A

LEFT JOIN user_profile AS B

on A.userid = B.userid
