

SQL WILD CARDS

24 August

- If there are similarities existing in a column
- We want to filter data based on a specific pattern in a column

- for more

(1) Underscore -

⇒ Represents a single letter / value
⇒ It could be a letter or a number
(A-Z or 0-9)

- 0 or more

(2) Percent sign %

⇒ Represents 0 or more characters

(3) Like operator

⇒ Allows us to filter our data by specifying what something is like on our column

SYNTAX: SELECT col1, col2, col3

FROM table_name

WHERE column LIKE 'pattern'

Customers

Cust-Id	Name	Product	Amount
101	John	Apple	20
102	Sarah	Banana	120
103	Michael	Orange	200
104	Johnny	Banana	100
105	Jay Jay	Kiwi	50

SELECT name,

amount

FROM customers

WHERE name LIKE 'Jo%';

Name	Amount
John	20
Johnny	100

Difference between LIKE & ILIKE

⇒ LIKE is case sensitive

⇒ ILIKE is not case sensitive
